

Saturday 2 Minute Video: The Advantage

What makes an organization healthy and why is organizational health critical to business success? Management guru and author Patrick Lencioni says that organizational health is the number one key to business

success; companies can have everything else on their side – über-intelligent leaders, superior processes, and products – but if they don't have organizational health, they're in danger of being eclipsed by the companies that do. It's when all the components that make up the organization – its management, operations, strategy, and culture – fit together and make sense in a way that is whole and complete. Companies are plagued with the politics, confusion and dysfunction that destroys organizational health.
